Legacy View makes setting up and monitoring your Texo water treatment system easier than ever. When used with a Legacy View Valve the user, through the app, can do the following functions:

- Manage your connection to your valves
- Better understand how your system is working and understand what settings are for
- Connect to all of your valves in your system (if they are all Legacy View Valves)
- Configure and view the servicing water treatment dealer information
- Conveniently view all valve settings and status
- View current water usage information
- Graphically view water usage information
- Start a regeneration or backwash cycle from your phone or tablet
- Easily change valve settings
